Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The attorney for Applicant argued that the "image file creation means including a vertical size and a horizontal size" is not inherent in Myojo. The examiner noted that Myojo discloses a number of images are used to produce an index image, and it is inherent that each of those images has a vertical size and a horizontal size. The examiner noted that adding the language "an image file including data describing a vertical size and a horizontal size" would overcome the rejection.
